Aaron Hirsimäki

Full-Stack Developer

Espoo, Finland · aaron.hirsimaki@proton.me · linkedin.com/in/aaron-hirsimäki · github.com/AaronHirsimaki · aaronhirsimaki.github.io/portfolio

PROFILE

Full-stack developer who loves building things and seeing ideas come to life. My strongest languages are Java and Python, React is my frontend of choice, and Lua is what I use for my own games. I solve problems creatively: in Cat Mayhem, my 2D roguelike, I built a collision system that makes a flat world look and feel 3D. In a client project I led deployment with Docker and Kubernetes. I deliver what's planned, on schedule, and I use AI tools to move faster while reviewing everything they produce. Open to software developer roles, available now.

EXPERIENCE

Backend & Deployment Developer, client software project 8-person team

Haaga-Helia University of Applied Sciences, for an external client

- Built a web application for a real client on the backend team (Python backend, React frontend); completed with an official work certificate
- Led deployment: containerised the app with Docker and deployed it on Kubernetes in CSC's Rahti container cloud
- Weekly meetings with the team and the client; features planned on a Kanban board

IT Technician (IT-asentaja) 2024 – present

Fujitsu · part-time, on-call gigs

- Installing and removing workstations at Fujitsu's customer sites
- Setting up halls for the Finnish matriculation exams: installing equipment, cabling and testing connections

PROJECTS

Cat Mayhem (Lua, LÖVE 2D, in development): top-down roguelike with waves of enemies, bosses, loot and upgrades. Custom collision system that gives the 2D world a 3D look and feel.

DGMarketplace (Java, Spring Boot, Spring Security, PostgreSQL): disc golf marketplace with access control, JPA repositories, Thymeleaf views and a REST API.

StudentApp (React, Vite, Supabase, Leaflet): map-based review platform for bar restrooms in Helsinki, with authentication, user reviews and star ratings.

freeGamesApp (React Native, Expo, Firebase): cross-platform mobile app for discovering free games, with Firebase authentication and wishlists.

TECHNICAL SKILLS

Languages	Java, Python, JavaScript, Lua, HTML, CSS, TypeScript (working knowledge)
Frontend	React, React Native, Expo, Vite, React Router
Backend & data	Spring Boot, Spring Security, REST APIs, PostgreSQL, Supabase, Firebase
Game dev	Lua, LÖVE 2D
DevOps & tools	Docker, Kubernetes, Git, GitHub, Linux
AI tools	Claude Code, Claude, ChatGPT

EDUCATION

Bachelor of Business Administration, Business Information Technology Expected 2027

Haaga-Helia University of Applied Sciences

Specialisation in full-stack development; favourite courses were the team-based software project courses.

LEADERSHIP & VOLUNTEERING

Event Manager, Atkins ry board 2025

Planned and organised events for Haaga-Helia's IT students as a board member of Atkins ry, the IT students' association.

Student Tutor, Haaga-Helia 2024 – 2025

Supported and guided new IT students through the start of their studies.

Live Crew, Assembly 2021 – present

Volunteer on the live production crew of Assembly, one of Finland's largest LAN parties and digital culture events: setting up, running and tearing down the live tech before, during and after the event.

LANGUAGES

Finnish (native) · English (fluent)
